

Adding New Peer

Steps

1. Generating crypto materials for the new peer that is to be added.
2. Creating docker-compose files for the peer to launch the new peer container.
3. Join the peer to the required channel.
4. Installing chaincode onto the new peer.
5. Invoke create car

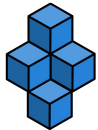

Adding New Org

Steps

1. Generating crypto materials for the new Org that is to be added.
2. Creating docker-compose files for the new org, to launch the new org components such as peer, couchdb and ca.
3. Fetching the channel config and updating it by adding the new org.
4. Sign and submit config update
5. Joining org3 to the channel.
6. Anchor peer update
7. Installing and invoking chaincode to the org3 peer.

Thank You :)
